

Rapid Recall A3 Whiteboards

Teacher Handbook

For RRB5A & B

Rapid Recall Whiteboard

Write  in words
(80 to 99)

Circle the facts bigger than

2 x 8	11 x 12	6 x 8	10 x 8	8 x 3
3 x 7	7 x 7	12 x 5	5 x 4	9 x 11
8 x 4	3 x 6	3 x 9	11 x 5	6 x 7

Work out each side, compare them and write a symbol <, > or =

10 x 3 x 2	6 x 5 x 3
	
5 x 10 x 5	20 x 6 x 2
	
2 x 9 x 5	7 x 2 x 2
	
3 x 7 x 2	3 x 10

Work out these calculations

 ÷ 1 =	 ÷ 4 =
 ÷ 3 =	 ÷ 2 =
 ÷ 8 =	 ÷ 6 =
 ÷ 5 =	 ÷ 7 =
 ÷ 10 =	 ÷ 9 =

Circle the numbers which are smaller than

XXX	LV	LXI	C
LXXI	LI	LXXIV	LVIII
XL	CX	XCI	XXXIX
XXXI	LXII	L	XCIX

Circle the sequence of multiples and circle the ones which are larger than

8	16
6	12
9	18
7	14

Write some factor pairs of 

 ÷ 10
 Double it
 Add 2
 - two tenths
 Round to the nearest unit

What is the perimeter of this rectangle?  cm  cm

What is the perimeter of this square?  cm  cm

Write at least 6 questions with the answer of 

Rapid Recall Whiteboard

You have  p You spend  p Amount left 

£2 coin	 p	2 x  p
£5 note		
£3.50	 p	
£130	 p	
£200		
		£  and  p
		£  and  p
		£  and  p
		£  and  p
		£  and  p
		£  and  p

Work out these money calculations

months = years and months

cm + cm = 1m

cm x 10 = m

mins x 4 = hours and mins

days = weeks and days

ml x 1000 = litres

RAPID RECALL BOARDS

YEAR 5 – SIDE A

The children may have recall of these facts, work them out or use estimation with facts they do know e.g. 7×8 is bigger than 36 because I know 7×5 is 35 .

The children have to work out the number on each side before comparing the answers.

The children may realise that the perimeter calculation is actually $6 \times$ their number or they may work out each of the sides then add them together.

Rapid Recall Whiteboard

Write in words

(30 to 99)

Circle the facts bigger than

7×8	11×12	6×8	10×8	8×3
3×7	7×7	12×5	5×4	9×11
8×4	3×6	3×9	11×5	$\times 7$

Work out each side, compare them and write a symbol <, > or =

$10 \times 3 \times 2$	
$6 \times 5 \times 3$	
$5 \times 10 \times 5$	
3×100	
$20 \times 6 \times 2$	
$2 \times 9 \times 5$	
-20	
$3 \times 7 \times 2$	
-10

C005P1 RR5A

In the answer sheets, it shows an answer with a remainder, an answer with the remainder converted to a fraction and the answer as a decimal where it is simple to convert. You can differentiate and choose to specify the type of answer you would like.

Roman numerals can be a challenging skill for the children. You may want to write up the value of the key symbols initially to assist them.

This looks at the place value changes when multiplying and dividing.

Depending on the number, there might not be any multiples bigger than their number.

The children may find the spelling of the words challenging.

This says ‘some factor pairs’, however for some children you could specify that you want all the factor pairs as an additional challenge.

Make sure the children realise the answer is taken forward each time, not the original number.

You can differentiate by asking the children to use particular numbers or operations e.g. use decimals, include fractions or money etc.

Work out each side, compare them and write a symbol <, > or =

Circle the numbers which are smaller than

Complete the sequence of multiples and circle the ones which are larger than

Write at least 6 questions with the answer of

Rapid Recall Whiteboard

Write  in words

(30 to 99)

Circle the facts bigger than 

7 × 8	11 × 12	6 × 8	10 × 8	8 × 3
3 × 7	7 × 7	12 × 5	5 × 4	9 × 11
8 × 4	3 × 6	3 × 9	11 × 5	6 × 7

Work out each side, compare them and write a symbol <, > or =

10 × 3 × 2		6 × 5 × 3		3 × 	20 × 6 × 2
					
					
					
					

Write some factor pairs of 

Th	H	T	U	•	t	h
						
	x 10					
	÷ 10					
	x 100					
	÷ 100					

	8	16				
	6	12				

Write at least 6 questions with the answer of 

	cm		What is the perimeter of this square?
→	2 x 	cm	→
→	2 x 	cm	→
→	7 x 2 x 2	cm	→
→		– 10	→

Circle the numbers which are smaller than 

	÷ 1 =		÷ 4 =	
	÷ 3 =		÷ 2 =	
	÷ 8 =		÷ 6 =	
	÷ 5 =		÷ 7 =	
	÷ 10 =		÷ 9 =	

RAPID RECALL BOARDS

YEAR 5 – SIDE B

This features a counting stick image to support counting up in steps. Encourage them to complete the facts they can work out easily first e.g. $2 \times$ is double, $4 \times$ is double $2 \times$, $8 \times$ is double $4 \times$ etc. Then they can work out the remaining numbers.

Ensure the children notice the sequence includes the feature number divided by 10 or 100, not the original number.

It is hard to be absolutely exact with the arrow but you are looking for an accurate estimate.

The answer is taken across each row to be used in the calculation, not the original number.

Rapid Recall Whiteboard

(30 to 99)

Draw an arrow to estimate $\frac{\square}{10}$ to 10

Complete the sequence in steps of 0.1

$\square \div 10$

Complete the sequence in steps of 0.01

$\square \div 100$

Workout the answers and write them in order from smallest to largest

$+ 25$

Round to nearest 10

$- 19$

\diamond cm \times 10 = <input type="text"/> m
\diamond mins \times 4 = <input type="text"/> hours and <input type="text"/> mins
\diamond days = <input type="text"/> weeks and <input type="text"/> days
\diamond \times 100ml = <input type="text"/> litres

If there are two decimals which are equal, they should list them next to each other.

The children have a variety of missing number calculation to complete. This can be challenging to do mentally and they may initially want scrap paper or a whiteboard to help work out the smaller stages of the calculations.

This can be challenging for the children as they have to calculate and convert between units. You may want to give children a reminder of the key unit conversions to help initially.

Rapid Recall Whiteboard

CURRICULUM
COMPLIANT

Have you seen the new Spintelligence kits?

Spintelligence Kits provide a flexible, versatile resource that will promote discussion and engagement in every subject. Choose packs from a wide range of different topics.

A range of activities are included to get you started. Then, using the set of blank drywipe templates, create your own games and activities.

Included in each Spintelligence Kit are 24 ready-to-use, colourful activity cards – 2 each of 12 activities. (except the starter kit which has 24 different activities). These introduce teachers to the amazing flexibility of the Spintelligence spinners range.

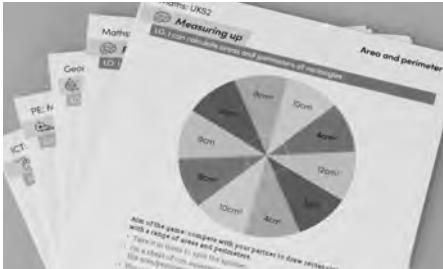

Each kit provides everything you need for children to instantly use the spinners and activities.

A range of drywipe blank templates are also included (4 each of 6 designs) to enable both adults and children to create their very own games and activities.

Spinners can be used individually, in pairs, groups or even as a whole class.

It's as easy as 1, 2, 3...

1 Look through the activity templates to gain an understanding of how the spinners can be used.

2 Choose one of these activity cards or create your own game using the blank spinner templates.

Included in each kit:

4 x Spinners with non-slip rubber feet

24 x Assorted Blank Drywipe Template Cards

24 x Pre-printed Drywipe Activity Cards

3 Put the spinner in place and spin to determine the action or question.

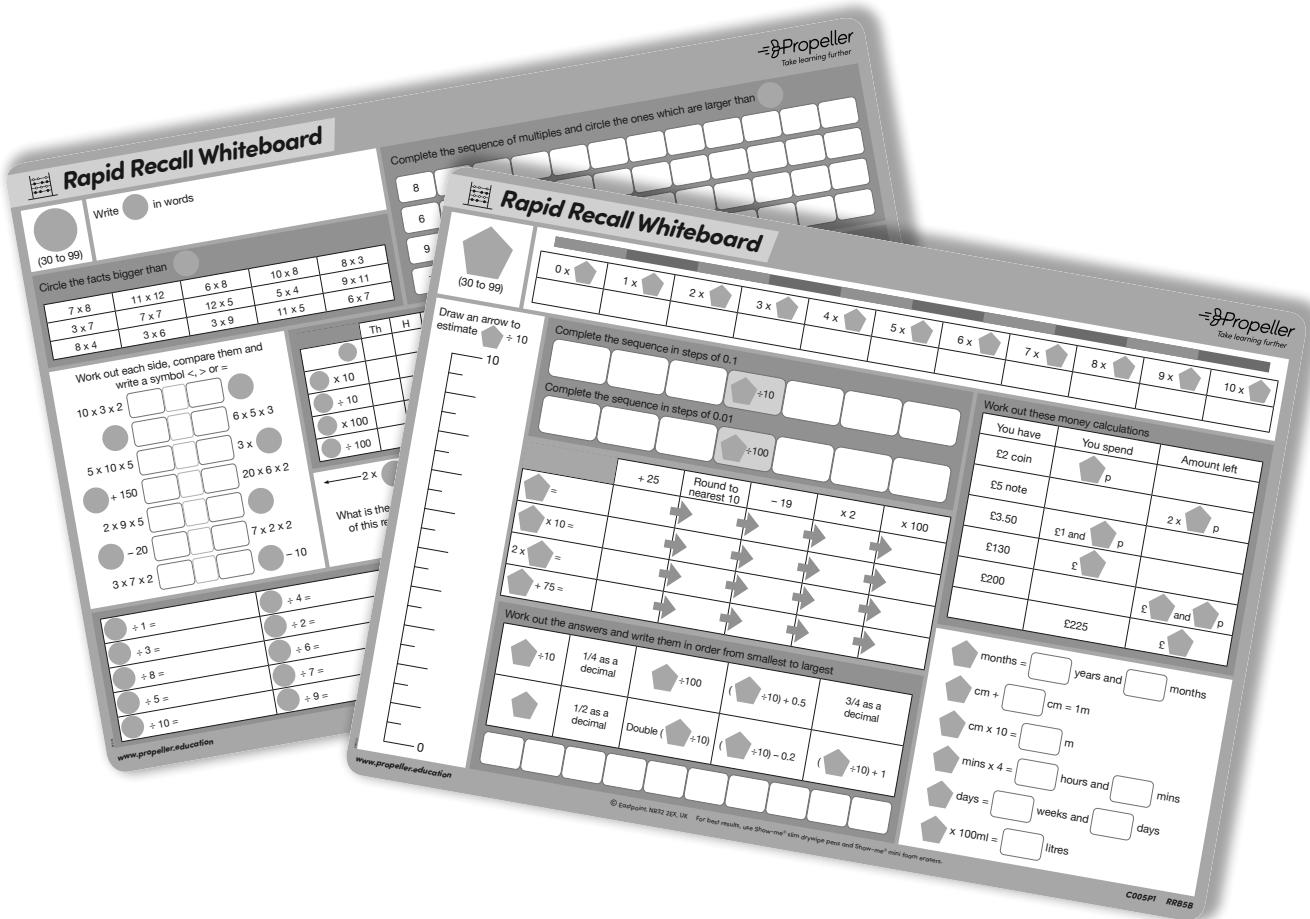

WE'RE PUTTING A NEW SPIN ON LEARNING

Care of your Rapid Recall Boards

Always wipe drywipe ink off your boards as soon after use as possible. When ink is left for too long on any whiteboard surface it can cause 'ghosting' or residue to be left.

As with all whiteboards, you will need to regularly clean the surface of your Rapid Recall Boards using a whiteboard cleaning spray and a soft cloth.

Purchase these items at www.propeller.education
